

FAS Asset Inventory

A member of Sage FAS fixed asset management solutions.

FAS Asset Inventory gives you automated fixed asset inventory tracking and reconciliation capabilities. Using state-of-the-art bar code technology, including Windows Mobile and Palm OS devices, FAS Asset Inventory creates and tracks multiple physical inventories of assets quickly and efficiently—so you achieve tighter control of your fixed assets.

Complete control over your entire asset inventory at every step.

- Integrates seamlessly with FAS Asset Accounting, allowing physical inventory data to be easily reconciled with existing asset data
- Conduct multiple inventories concurrently at various sites and reconcile data at one central location
- Supports both types of inventories—*Baseline* to add new assets, and *Dynamic* to verify any data on existing assets
- Track assets at remote locations, where inventories can be conducted by exchanging data via email attachments
- “Import/Export Helper” allows you to import data from, or export data to, the most popular spreadsheets and database applications
- Windows Mobile and Palm OS devices make it easy to perform inventories with less expensive bar code readers containing more memory

Top-Notch Service and Support from Sage FAS

FAS SupportPlus— Protect your investment and get the most value from your software with FAS SupportPlus. With FAS SupportPlus, you're entitled to:

- Toll-free technical support
- Annual tax updates
- Online technical resources
- Product enhancements
- A quarterly online newsletter
- And more!

FAS Training Classes— Get up to speed fast on your new FAS solution by attending one of our in-depth, hands-on training classes held at convenient locations nationwide.

- FAS Product Upgrades
- Fixed Asset Inventory Services

(over, please...)

FAS Asset Inventory

Hand-held devices make conducting inventories easy.

- On-screen “Virtual Reader” lets you perform a test inventory—and even add assets—before you invest in hardware
- Fifty-one fully customizable fields with the ability to control data entry and notes, plus images to describe each asset record
- “Secondary Tag” field allows you to summarize assets by room location while conducting inventories
- “Groups,” “Templates,” “SmartLists,” and “Search-and-Replace” features provide powerful asset management tools and streamline inventory methodologies
- “Detail View” provides complete information including property type, class, acquisition date, supplier location, GL asset account, accumulated and expense account numbers, custodian, and more
- Customize “Group View” with drag-and-drop “freezeable” identifier columns (Display or hide columns to view precisely the information you want in the order you want to see it, all while saving your custom settings automatically)
- “Check-In/Check-Out” feature with a “Check-Out History” constantly monitors assets on the move
- Also available for Microsoft SQL Server
- Fixed asset inventory labels available for purchase online at www.sagefas.com/labels

The Sage FAS family includes:

- FAS FirstStep
